

INTERNSHIP: SOFTWARE ENGINEERING

About You:

You (m/f/d) are currently enrolled in a technology-related degree program (computer science/mathematics/physics/data science, etc.) and are interested in developing modern applications in the cloud. You have in-depth knowledge of any programming language and are open to cross-disciplinary collaboration with colleagues from the investment area. You bring along a fast comprehension and a lot of willingness to learn.

Your contribution:

As a task, you can expect to work on the development of innovative software solutions. We focus on automation and full agility through the use of modern cloud technologies.

You will develop applications and visualizations with Python, R or C#, which will enable, simplify and automate our services in quantitative portfolio management.

About us:

finccam delivers holistic investment solutions in simplicity and perfection. We stand for "Puristic Investing", focusing on the essentials in the context of institutional investment. In addition to overall portfolio construction, our core competencies lie in the management of risk premia strategies and risk management strategies. We rely on the combination of man and machine to achieve optimal results. Our experts with many years of capital market experience use state-of-the-art methods and approaches of data analysis.

As an independent owner-managed investment boutique, we are committed only to our clients and their goal achievement. Our team members are acting as experts and thought leaders for many years. We combine excellence of results with the motto of "working among friends". In order to achieve outstanding results, we focus on the working atmosphere, the team and individual advancement.

You can find more information at finccam.com.

We offer You:

A great team with dynamic colleagues who like to learn and pass on knowledge, in a very entrepreneurial environment, with the opportunity to use and get to know the latest technologies, with an attractive compensation, flexible working hours and a great office in the center of Munich.

You will take part in our team meetings and internal training sessions, and at the start of your time with us you will be given an insight into various areas of our work by the colleagues responsible.

You are interested:

Then please send your application to internship@finccam.com with a meaningful CV and an information about the period in which you would be interested to do an internship.
