

INTERNSHIP: WEB DEVELOPMENT

About You:

You (m/f/d) are currently enrolled in a technology-related degree program (computer science/mathematics/physics/data science, etc.) and have already gained some experience in web development. You were able to work in the frontend (preferably with Vue.js) and/or in the backend (preferably with Django). You bring a quick perception and a lot of willingness to learn with you.

Your contribution:

As a task, you can expect to work on the development of web applications and dashboards. You will work in close cooperation with our portfolio management on the implementation of new cloud-based features of our integrated trading systems and dashboards.

About us:

finccam delivers holistic investment solutions in simplicity and perfection. We stand for "Puristic Investing", focussing on the essentials in the context of institutional investment. In addition to overall portfolio construction, our core competencies lie in the management of risk premia strategies and risk management strategies. We rely on the combination of man and machine to achieve optimal results. Our experts with many years of capital market experience use state-of-the-art methods and approaches of data analysis.

As an independent owner-managed investment boutique, we are committed only to our clients and their goal achievement. Our team members are acting as experts and thought leaders for many years. We combine excellence of results with the motto of "working among friends". In order to achieve outstanding results, we focus on the working atmosphere, the team and individual advancement.

You can find more information at finccam.com.

We offer You:

A great team with dynamic colleagues who like to learn and pass on knowledge, in a very entrepreneurial environment, with the opportunity to use and get to know the latest technologies, with an attractive compensation, flexible working hours and a great office in the center of Munich.

You will take part in our team meetings and internal training sessions, and at the start of your time with us you will be given an insight into various areas of our work by the colleagues responsible.

You are interested:

Then please send your application to internship@finccam.com with a meaningful CV and an information about the period in which you would be interested to do an internship.
